Dr. Barbara Lackey 714-838-4174

EDUCATIONAL & PSYCHOLOGICAL SCREENING INFORMATION

Educational and Psychological screening for attention and learning deficits is available from Outreach Concern, Inc. The cost for this screening approximately is \$275.00 per child.

The screening is administered by Dr. Barbara Lackey, Licensed Educational Psychologist (EP 1351). The screening process takes approximately two hours and will address the student's attention skills, basic academic skills, learning skills, social-emotional issues, and will include a consultation with the parents. The parent will leave the conference with a handwritten copy of the results, which will be followed by mail with the formal (typed) copy of the results. A copy of the formal report will also be mailed to the Principal.

Be sure to identify the school your Child attends and the name of his or her teacher when you call to make the appointment. You and your child's teacher will be mailed a questionnaire packet regarding your child's performance (the AADES) along with a self-addressed return envelope. The appointment will not be scheduled until the completed forms from ***both***, the parent and the teacher, have been returned by mail.

Please note that the testing procedure conducted by Dr. Lackey is a ***brief screening*** and is utilized to identify or screen out various Educational and Psychological problem areas. ***It is not, nor should be assumed to be, a full psycho/educational battery.*** If the screening reveals indicators identifying the possibility of learning disability, additional in-depth testing to determine whether the student meets the State criteria for placement as a learning disabled student, can be recommended. If this ***does not*** appear to be the case, additional testing would not be recommended.

We are confident that the screening process will provide you with timely and practical information of value in formulating the best plans for your student's education.
